GEORGIA

Franklin College of
Arts and Sciences

ARTS AND SCIENCES

As the heart of UGA, the Franklin College of Arts and Sciences champions the intersection of the arts and sciences – harnessing the power of joining multiple disciplines together for the shared purpose of solving problems through our academic excellence, collaboration and innovative research.

Named for Benjamin Franklin, we have looked to the future for over two centuries. By fostering critical thinking and creativity across fields – from languages and biology to computer science and the arts – the Franklin College empowers students to build their futures and become active, involved citizens making an impact in the state of Georgia, and the world. With over 250 programs, there is a place for everyone in Franklin.

At Franklin we seek the exceptionally curious, the undeniably ambitious, the wildly creative, the boldly innovative – tomorrow’s leaders. This is the Franklin Spark. Your personal advancement is our top priority. We couple rigorous academics with study abroad and experiential learning to bring out your best. Where you go next is up to you. Let’s move forward together.

250+ programs, degrees and certificates providing rigorous learning to prepare students to solve real-world problems

3 of the most popular UGA majors (biology, computer science, and psychology)

6 of the most popular minors (biology, communications studies, computer science, sociology, Spanish and studio art)

33 study abroad programs across 5 continents and 57 countries – from one week to an entire semester, top countries including England, France, Italy, Spain and Argentina

WORLD-CLASS FACULTY AND RESEARCH

Our faculty includes members of the American Academy of the Arts and Sciences, the National Academy of Inventors and the National Academy of Sciences; as well as Rhodes Scholars, Fulbright Scholars, Guggenheim Fellows, Ford Fellows, MacArthur Fellows and more.

UNDERGRADUATE RESEARCH

Driven by faculty research, our labs and clinics provide students with an opportunity to work alongside leaders in their field. Research grants include Department of Defense, National Institute for Health, National Science Foundation and more. Franklin is home to a collaborative research culture that explores multidisciplinary solutions to today’s most pressing challenges.

REAL-WORLD PROJECTS – LEARNING THAT MAKES A DIFFERENCE

Franklin’s capstone courses, internships and experiential learning offerings provide opportunities for students to engage in real-world projects working alongside world-renowned faculty, alumni and business leaders alike, to put their academic pursuits into practice and develop leadership skills.

AWARD-WINNING ADVISORS AND INSTRUCTORS

Experience a small college feel within a vibrant, extensive environment. We have advisors who care and are committed to student success.
